Fuse	2A (ATC Type)

All specifications subject to change without notice.

Connection Diagram

Connect the wires as indicated:

- Red: Connect to a switched(+) 12 volt source (ACC). Use a lead that has(+) 12V when the ignition on or in the ACC position so the monitors turns off when the key is in the off position. Wiring the monitors "hot" could cause your battery to run down when the engine is not running.
- Black: Connect to a good chassis ground.
- Reversing the polarity of the red and black leads will damage the monitor.
- Connect the video input connector to the video output from the source unit
- Test the system.

Installation

Universal Headrest with Pre-installed Monitor Owner's Manual

Congratulation on your purchase of this headrest monitor sytem. The product is designed and built to deliver excellent video quality and long lasting high performance, For best results please consult a professional mobile eletronics installer for application advice or troubleshooting. Please read these instrutions thoroughly before installation.

Installation Instructions

1. Remove the existing headrest from the seat.
2. Adjust the posts of the new headrest to fit the holes in the seat where the headrest will be installed. The post can be moved together or apart grasp one post in each hand, move the posts in opposing directions (like they were walking) while pushing them toward each other or away from each other.
3. Insert the cable in the proper hole. Insert the posts into the holes in the seat and carefully work the headrest into position. Make sure the cable is not pinched.
4. Run the cable down the seat and out to the location of the video source unit (such as a DVD player).

- 9 Speaker**
- 10 Adapter Post**
- 11 REMOTE IR SENSOR**
- 12 IR**
- 13 A/V 2 Input**
- 14 HEADPHONE JACK**

Installation

Adapter Posts

Since the spacing of the mounting holes can vary on different vehicles we supply two Adapter Posts(12 diameter). Use these Adapter Posts when the headrest mounting holes in your seat are too large for the Adapter Posts of the headrest monitor.

How to adjust the distance between the Adapter Posts

See the picture on the right and you can adjust the distance between the Adapter Posts to required space.

Remote control

- 1 POWER**
Press to turn unit ON or OFF.
- 2 VIDEO SELECT**
Use this button to switch between A/V Source 1 and A/V Source 2.
- 3 MENU**
